Purpose

The Internet is at the same time a place of enormous opportunity and one of huge risk and it can be difficult to know which websites are safe and which are not. Innova Solutions Inc. has a duty to its employees and other interested parties to protect them and itself from harmful content, and a necessary way of achieving this is to monitor user activities and block those that are potentially unsafe.

Reasonable personal use of the Internet from organization-supplied devices is permitted and the intention of Innova Solutions Inc. is to strike a fair balance between safety and convenience for its employees.

This policy describes the principles that Innova Solution's uses to decide which sites will be blocked and the main mechanisms that are used to achieve this.

Scope

This control applies to all systems, people and processes that constitute the organization's information systems, including board members, directors, employees, suppliers and other third parties who have access to Innova Solution's systems.

Policy

Access to the Internet from devices provided by Innova Solutions Inc. will be monitored to ensure that exposure to malicious content is minimized.

Where possible, this will include access via networks outside of the control of Innova Solutions Inc., such as broadband connections when working from home or when mobile working.

Monitoring will always comply with relevant legislation within the employee's country of employment.

Access to websites that are inappropriate will be blocked for the user. Specific, business-justified requests to access blocked websites may be allowed by management on an exception basis.

A list of categories of websites that will be blocked will be maintained by the IT team. In general, these will include websites which:

- Host malware or are involved in phishing activities
- Are concerned with illegal content, such as file sharing
- Provide inappropriate content, such as sexually explicit, illegal drugs, intolerance, violence and weapons
- Host downloads of specific file types, such as executables

Access to web-based email will be allowed but must be used with caution. File downloads of allowed file types will be permitted.

Access to social networking sites is generally permitted in accordance with the Innova Solution's Acceptable Use Policy.

All Innova Solution's users will be informed that their Internet access is monitored according to this policy, and awareness training will be provided concerning the main threats involved.

Attempts to access blocked websites will be logged and will be available in management reports, which may be used as the basis of disciplinary action for persistent cases.

Amendments to web filtering policies within monitoring software will be subject to change control.

Compliance

Internal Audit activity should be planned and conducted in accordance with this procedure. Compliance with this procedure is mandatory and will be measured in Internal and External Audits.

Disclaimer

Company's Absolute Right to Alter or Abolish the Procedure

Innova Solutions Inc. reserves the right in its absolute discretion to abolish the procedure and dissolve at any time or to alter the terms and conditions. Such discretion may be exercised any time, before; during or after the procedure year is completed.
